

# HICAPS TRINITY TERMINAL Camera Permissions

## Re-enabling Camera

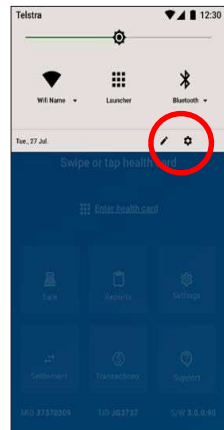

When you tap on **Scan QR**, and you tap on **DENY** when the terminal asks permission to **Allow HICAPS to take pictures and record video?** and tick **Don't ask again** you will be unable to use the camera to scan a QR code.

To re-enable the camera to use the QR option, follow the steps below

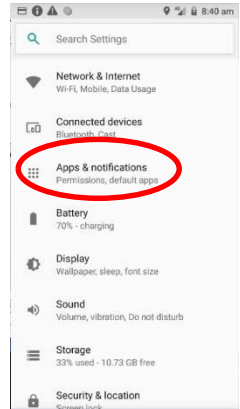

### STEP 1

From the **HICAPS Home screen**, drag your finger from top of the screen to display the Android 'quick settings' panel. Tap on the **Settings Cog**

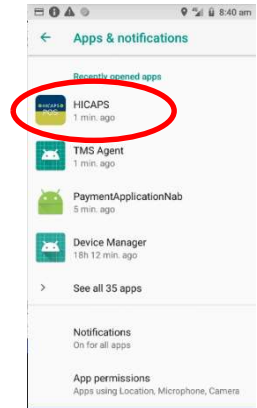

## STEP 2

Tap on **Apps & notifications**

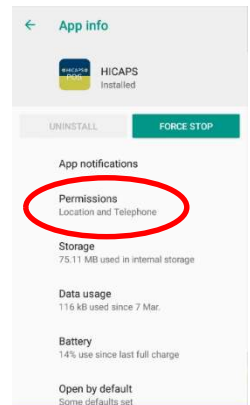

## STEP 3

From the **App & notifications** screen, tap on **HICAPS**.

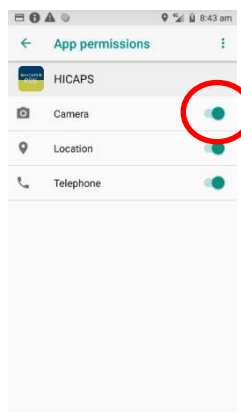

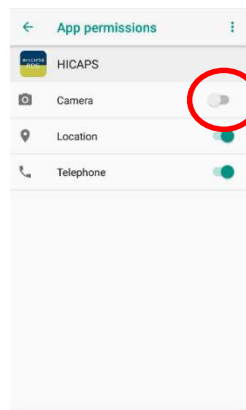

## STEP 4

This will take you to the **App info** screen for HICAPS. Tap on **Permissions**

## STEP 5

To allow the terminal to use the camera to scan QRs, turn on **Camera** by tapping on the button on the right-hand side of **Camera**.

Tap on home button at the bottom of the terminal to save camera permissions and return to the HICAPS Home screen. You will now be allowed to scan a QR code.
